SKILLS

- TypeScript / JavaScript
- Python / Node.js
- SQL / SQLite / MySQL
- REST APIs / Integrations
- AI Agents / MCP
- LLM Workflows / Evaluation
- Automated Testing / pytest / Vitest
- Git / GitHub Actions
- Agent Orchestration / Tooling
- Evidence Gating / Human Review
- Google Apps Script
- Magento 2 / Shopify

LANGUAGES

- Finnish (Native)
- English (Excellent)
- Swedish (Good)
- Norwegian (Basics)
- Danish (Basics)

PRINCIPLES

- Structured problem solving
- Reliability-focused development
- Comfortable with ambiguous requirements
- Bridging business needs and technical implementation

PROFILE

Business Information Technology graduate with 3+ years of professional experience in automation, API integrations, and digital systems. I lead AI-assisted TypeScript and Python projects focused on agent workflows, evidence-grounded decisions, human oversight, and reliability testing. I combine technical problem-solving with practical business understanding.

PROJECTS

Knotty (Formerly Support Ticket Triage) May 2026 - Present

AI-assisted support operations and diagnostic research

TypeScript • Node.js • SQLite • MCP • LLM workflows

- Developed an MCP-enabled support workflow with evidence-gated diagnosis, human approval, fix verification, and auditable lifecycle management.
- Built deterministic safeguards, AI-assisted recommendations, knowledge-reuse governance, and recovery/replay testing.
- Designed a blinded Home Assistant diagnostic evaluation across 24 historical cases and 64 evidence checkpoints; human review is ongoing.

Coding Agent Harness October 2026 - Present

Supervised AI coding-agent execution and verification

Python • Git • pytest • CLI tooling • Agent orchestration

- Directed AI-assisted development of a Python harness that separates agent completion claims from independent Git evidence, automates checks, and supports human acceptance decisions.
- Developed and validated safeguards for file scope, subprocess execution, bounded retries, evidence freshness, and audit records through adversarial regression testing.

EXPERIENCE

IP-Agency Finland Oy June 2022 – February 2026

Traffic Specialist **Started as an intern;** employed from November 2022

- Designed and implemented a Google Apps Script automation integrating Klaviyo and analytics APIs to automate recurring reporting across 9+ e-commerce stores.
- Worked with API integrations, data automation, reporting, troubleshooting, and e-commerce systems, including Magento 2 and Shopify.
- Developed personalization and automated marketing workflows alongside responsibilities in email marketing, SEO/SEM, and website traffic.

EDUCATION

Laurea University of Applied Sciences September 2019 - June 2023

Business Information Technology

Bachelor of Business Administration

Focus: Software development, information systems and the intersection of technology and business

DIRECTION

AI Agent Engineering • Reliable Automation
Evaluation & Testing • Human-in-the-Loop Systems
Software Reliability • Evidence-Grounded AI
